1. Executive Summary

This document constitutes a formal Quotation and Master Service Agreement ("Agreement") between **Sitekraft.dev** ("Service Provider"), based in Kanpur, Uttar Pradesh, India, and **Sukhdev Chaudhari** ("Client"), an individual investor based in Jodhpur, Rajasthan, India. It sets out the complete commercial, technical, and legal terms governing the design, development, and delivery of **Bulkbeat**, a native Android mobile application for stock-market portfolio intelligence and institutional-activity tracking, intended for publication on the Google Play Store.

A web-based version of Bulkbeat has already been built by the Service Provider to validate the product direction and underlying feature set. This Agreement covers the next stage of the project: building a native **React Native Android application**, integrated with real, live market data through an extended version of the existing backend API, and preparing it for submission to the Google Play Store.

The application is designed to give an individual investor a fast, structured read on portfolio health, delivery-based institutional activity, smart-money accumulation/distribution signals, and broader market context — combining automated data analysis with an AI-generated plain-language summary layer.

Expected Timeline: 6 weeks from project start. Sitekraft.dev, represented by CEO Ayush Tripathi, will execute the engagement in five phases described in Section 6.

The total development fee for this engagement is **₹35,000**, payable as ₹10,000 in advance, ₹10,000 on MVP delivery, and ₹15,000 on completion of testing and final handover. Recurring infrastructure, third-party data, and Google Play Store costs are separate from this fee and are the Client's responsibility, as detailed in Sections 7 and 8.

2. Project Overview

From Web Prototype to Native Android Application

Bulkbeat began as a web-based prototype used to validate the product concept and feature set with sample/limited data. This Agreement covers building on that foundation to deliver a dedicated, native **React Native application for Android**, connected to real, live market data, and packaged for submission and listing on the Google Play Store under the Client's own developer account.

Primary Users

- Individual investors and traders tracking their own portfolio for institutional-activity signals.
- Users browsing broader market trends, discovery filters, and calendar events from within the app.

What the Application Delivers

For a user's tracked portfolio and for the broader market, Bulkbeat is intended to surface: an overall portfolio health score and risk rating, delivery-percentage and institutional-participation trends, accumulation/distribution tagging per stock, an actionable watchlist ("Consider Adding" / "Monitor Closely" / "High Risk"), market-wide trending and discovery tools, detailed per-stock data pages, and a market events calendar — with an AI-generated narrative layer summarising the key signals in plain language.

What This Project Is Not

Bulkbeat is an informational and analytical tool built on market data and automated pattern detection. It is not a substitute for professional investment, financial, or tax advice, and Sitekraft.dev is not a SEBI-registered Research Analyst. This distinction is reinforced in Section 13 (Risk & Compliance Disclaimer).

3. Scope of Work Summary

The scope of this engagement covers the end-to-end design, development, and Google Play Store submission-readiness of a native Android application built in React Native, comprising the four feature modules detailed in Section 4, integrated with real, live market data via an extended version of the Client's existing FastAPI backend. Sitekraft.dev is responsible for the mobile app build, the backend extension work required to serve it, and preparing the submission package for the Play Store. The Client is responsible for cloud infrastructure ownership/billing, the Google Play Console developer account, and any required third-party data credentials, as detailed in Sections 7 and 8.

In-Scope Deliverables at a Glance

- 1 A native React Native Android application implementing all four feature modules listed in Section 4.
- 2 Integration with real, live market data through the extended existing backend API.
- 3 An AI/LLM-powered narrative summary layer for portfolio and stock-level insights.
- 4 A build package ready for submission to the Google Play Store under the Client's own developer account.

Data & Scope Disclaimer: *The deliverables described in this document are limited to implementation using the data sources and methodologies available and accessible at the time of development. The accuracy, completeness, and continued availability of live market data, news, and any third-party feeds are outside Sitekraft.dev's control. Where a data source becomes unavailable during development, Sitekraft.dev will propose the closest suitable alternative; this does not by itself constitute a change in the agreed fee unless the alternative requires materially different engineering effort, in which case it will be handled as a change request per Section 9.*

4. Feature Specifications

This section specifies the four feature modules that make up the Bulkbeat application. Each module is described in terms of its purpose, the individual features it contains, and its dependency on live data.

4.1 Portfolio Intelligence & Risk Suite

PURPOSE

Gives the user a fast, structured read on the health and institutional-activity trend of their tracked portfolio, combining several signals into a single actionable view.

FEATURES INCLUDED

- **Portfolio Intelligence Report:** overall portfolio health score, risk rating, institutional-interest trend, delivery-percentage analysis (10-day and 15-day average vs. current), volume/open-interest trend, fresh long-buildup detection, a news-sentiment summary, and an AI-generated verdict.
- **Per-Stock Smart Money View:** accumulation/distribution tagging for each held stock, its delivery-percentage trend, and short AI commentary.
- **Portfolio-Wide AI Insights:** aggregate statistics such as how many stocks show rising delivery, above-average volume, fresh long buildup, or signs of institutional distribution.
- **Action Center:** stocks grouped into "Consider Adding", "Monitor Closely", and "High Risk" buckets based on the computed signals.
- **Institutional Activity Meter:** a trend-based indicator (rising/falling participation) rather than a single raw delivery-percentage figure, so the user can read direction at a glance.

DATA & DEPENDENCY NOTE

All figures in this module (delivery %, OI, institutional trend, AI verdict) are computed from the live market-data pipeline described in Section 5 and are dependent on that data being available and current at the time of viewing. AI-generated verdicts are informational only — see Section 13.

4.2 Market Discovery & Trending Hub

PURPOSE

Helps the user look beyond their own portfolio to what is moving in the broader market, and to filter down to specific setups they are watching for.

FEATURES INCLUDED

- **Trending Hub:** Top Gainers/Losers, Most Viewed Stocks, Most Discussed Stocks, Most Liked News.
- **Market Summary:** a snapshot view of Nifty 50, Bank Nifty, and Sensex.
- **Stock Discovery Filters:** Trending Today, Upcoming Results, 52-Week High/Low, Breakout Stocks, High Volume, High Delivery, Gap Up/Gap Down, Near Support, Near Resistance.

DATA & DEPENDENCY NOTE

Trending and discovery data reflects live market activity and is refreshed from the same backend pipeline as Module 4.1. Filter thresholds (e.g. what counts as "high volume") will be defined during development in consultation with the Client.

4.3 Stock Detail & Deep Dive

PURPOSE

A dedicated detail page for any individual stock, bringing together live pricing, fundamentals, and AI-generated context in one screen.

FEATURES INCLUDED

- Live price and an interactive price chart.
- Company profile and an AI-generated summary of the business/stock.
- Key ratios, financials, and quarterly results.
- Shareholding pattern, peer comparison, and promoter-holding trend.
- Corporate actions, dividend history, and split/bonus history.

DATA & DEPENDENCY NOTE

This module depends on the continued availability of company fundamentals and corporate-actions data through the existing data pipeline; where a specific data point is not available for a given stock, that field will be shown as unavailable rather than estimated.

4.4 Market Calendar & Global Data

PURPOSE

Gives the user forward-looking context — what events are coming up, and how the broader global market is behaving — alongside a defined free-vs-paid feature split.

FEATURES INCLUDED

- **Market Calendar:** Earnings Calendar, Dividend Calendar, Bonus Calendar, Split Calendar, AGM/EGM dates, IPO Calendar (including SME IPOs).
- **Global Market Data:** global indices, GIFT Nifty, USD/INR, crude oil, gold & silver, India VIX, sector performance, and a market heat map.
- **Free vs. Paid/Premium Tier:** a defined split between features available to all users at no cost and features reserved for a paid/premium tier.

DATA & DEPENDENCY NOTE

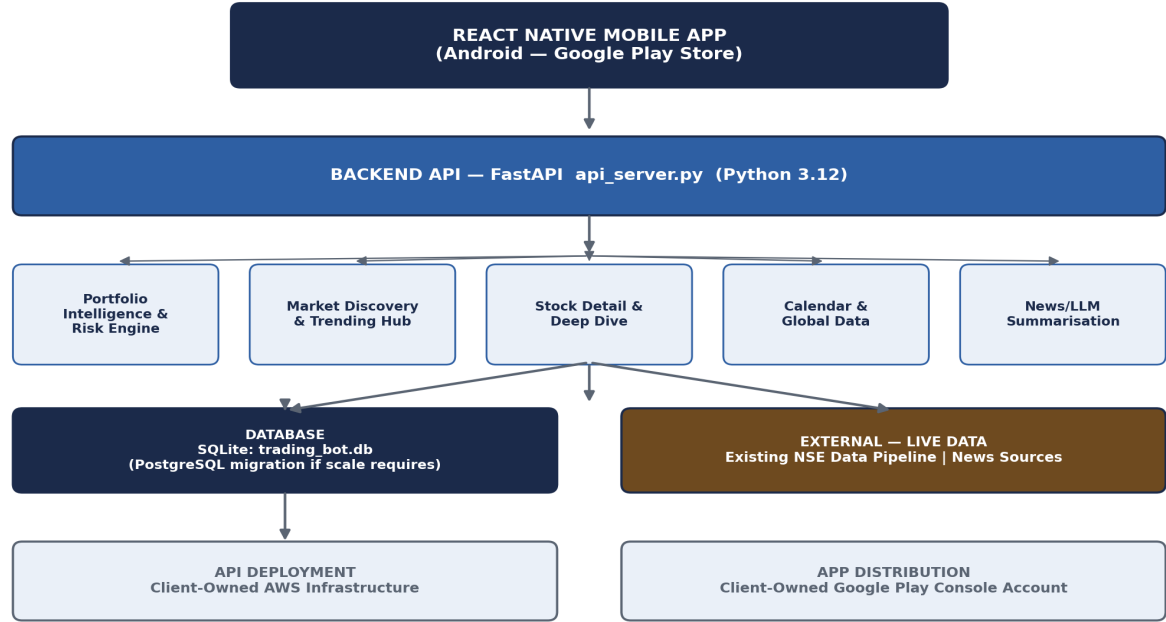

The exact boundary between Free and Paid/Premium features will be finalised collaboratively with the Client during development and is not fixed by this Agreement; the underlying features themselves are as listed above.

5. Technical Architecture

Bulkbeat is architected as a native React Native Android application talking to an extended version of the Client’s existing FastAPI backend. The diagram below shows the high-level components: the mobile app, the backend API layer, the five service modules corresponding to the feature set in Section 4, the existing SQLite database, the live external data pipeline, and the two distribution surfaces — the API on the Client’s AWS infrastructure, and the app itself on the Client’s Google Play Console account.

BULKBEAT — SYSTEM ARCHITECTURE

Native Android Application, Backed by a Live Data API Layer

5.1 Technology Stack

Component	Technology Selection
Mobile App	React Native (Android)
Backend / API Layer	FastAPI / Python 3.12 (existing api_server.py, extended)
Database	SQLite (existing trading_bot.db); PostgreSQL migration if scale requires
Market Data	Client's existing live NSE data pipeline
AI / LLM Layer	Existing LLM-based summarisation, extended for mobile use cases
API Hosting	Client-owned AWS infrastructure
App Distribution	Client-owned Google Play Console developer account

The specific in-app charting and visualisation approach will be selected during development based on what best fits the React Native environment and the data being displayed, and may evolve as the app is built.

6. Timeline & Milestones

Total Duration: 6 weeks from project start.

The following is an indicative phase breakdown across the 6-week engagement:

Phase	Week(s)	Key Deliverables
Phase 1	Week 1	Design finalisation and technical architecture setup for the React Native app.
Phase 2	Weeks 2-3	Frontend development — core screens across all four feature modules, built against s
Phase 3	Weeks 3-4	Backend extension and live-data integration, connecting the app to the existing FastA
Phase 4	Week 5	End-to-end testing across devices, bug-fixing, and performance tuning.
Phase 5	Week 6	Final integration, Play Store submission packaging, and complete handover.

Note: This timeline covers Sitekraft.dev’s development and submission-packaging work. It does not include the Google Play Store review/approval period once the app is submitted, which is conducted by Google and is outside Sitekraft.dev’s control (see Section 10, Assumptions & Dependencies).

7. Pricing & Payment Terms

Total Development Fee: ₹35,000 (Rupees Thirty-Five Thousand Only)

Fee Breakdown:

Component	Amount
Design	₹5,000
Frontend Development	₹10,000
Backend Development	₹10,000
Testing	₹5,000
Database Architecture	₹5,000
Total	₹35,000

Payment Schedule:

Milestone	Amount	Timing
Advance Payment	₹10,000	Payable before development begins.
MVP Delivery	₹10,000	Payable upon delivery of the working MVP build (end of Phase 3).
Final Handover	₹15,000	Payable upon completion of testing and full project handover.

Important: This fee covers software development services only. It does not include the ongoing cost of cloud infrastructure, market-data services, or Google Play Store fees — these are described in Section 8 and are the Client’s direct responsibility.

The final payment of ₹15,000 is payable upon completion of testing and full project handover. Full source code and intellectual-property rights are handed over only after receipt of the final payment in full — see Section 12, Clause 3 (Intellectual Property) and Clause 5 (Payment Terms & Late Payment).

8. Infrastructure & Third-Party Cost Responsibility

The following costs are to be borne directly by the Client and are **not** included in the ₹35,000 development fee described in Section 7.

API / Server Hosting

The backend API is deployed on the Client's own AWS infrastructure. Hosting cost is not fixed and will vary with actual usage and load (traffic, storage, compute, and data-transfer volumes); it is billed directly to the Client's own AWS account and paid by the Client.

Live Market Data / Third-Party APIs

Any market-data, news, or LLM API usage charges are billed directly to the Client's own account(s) and are borne entirely by the Client. Sitekraft.dev will integrate using credentials securely provided by the Client.

Google Play Store

The Client is responsible for creating and maintaining their own Google Play Console developer account, including the one-time Google Play Console registration fee, and for all ongoing compliance with Google Play's developer policies once the app is listed.

Actual AWS, market-data, and Google Play costs depend entirely on usage and on the respective providers' own pricing, and are not fixed or guaranteed by Sitekraft.dev.

9. Maintenance & Change Policy

Bug-Fix Warranty (30 Days, Free)

For thirty (30) days following final handover, Sitekraft.dev will fix, at no additional charge, any genuine defect where delivered functionality does not match the agreed specification set out in Section 4.

Change Requests (Paid)

Any new feature, modification to existing behaviour, design change, or functionality not explicitly listed in the four Feature Specifications (Section 4) will be treated as a separate, individually scoped and quoted change request — regardless of whether it is requested within or after the 30-day warranty window.

This includes, for example, an iOS/App Store version of the application, which is not part of this Agreement (see Section 10, Exclusions) and would be scoped and quoted separately if required.

10. Exclusions

The following items are explicitly excluded from the ₹35,000 development fee and from the scope of this Agreement:

- iOS / Apple App Store version of the application — this Agreement covers Android / Google Play Store only.
- AWS/API hosting charges and any recurring infrastructure costs (Section 8).
- Market-data, news, and LLM/API usage charges, billed directly to the Client's own accounts (Section 8).
- Google Play Console developer registration fee and ongoing Play Store compliance (Section 8).
- Major redesign or structural changes to features requested after phase approval/sign-off.
- Any feature or functionality not explicitly listed in the four Feature Specifications (Section 4).
- Ongoing maintenance, monitoring, or updates beyond the 30-day bug-fix warranty (Section 9).
- Any delay in Google Play Store review/approval once the app is submitted — this is conducted by Google and is outside Sitekraft.dev's control.

Any of the above may be undertaken as a separate, explicitly quoted engagement outside this Agreement, subject to mutual written agreement.

11. Assumptions & Dependencies

This Agreement and the timeline in Section 6 are based on the following assumptions and Client-side dependencies:

- 1 The Client will provide AWS credentials, any required market-data/LLM API keys, and Google Play Console access within a reasonable time of the relevant project phase commencing (see Section 6).
- 2 Data Availability: the accuracy, completeness, and continued availability of live market data and news feeds is outside Sitekraft.dev's control, per the Scope Disclaimer in Section 3.
- 3 The Client will review and respond to milestone deliverables within a reasonable turnaround time, so as not to compress the remaining phases in Section 6.
- 4 The scope is limited to a native Android application distributed via Google Play; no iOS/App Store build is assumed or included (Section 10).
- 5 Feature specifications in Section 4 represent the complete agreed functional scope; any functionality not listed there is out of scope unless added by written amendment (Section 12, Clause 13).
- 6 Google Play Store review and approval, once the app is submitted, is conducted solely by Google and its timeline is outside Sitekraft.dev's control.
- 7 The Client understands and accepts that Bulkbeat's outputs (scores, tags, AI verdicts) are informational only and not investment advice, as detailed in Section 13.

12. Formal Terms & Conditions

The following clauses constitute the formal legal terms of this Agreement between Sitekraft.dev (the "Service Provider") and Sukhdev Chaudhari (the "Client"), collectively the "Parties."

1. Definitions

"Agreement" refers to this Quotation cum Master Service Agreement document in its entirety. "Services" refers to the design, development, and Play Store submission-preparation of the Bulkbeat Android application as specified in Section 4 (Feature Specifications) and Section 5 (Technical Architecture). "Deliverables" refers to the software, code, and documentation produced under this Agreement.

2. Scope of Agreement

Sitekraft.dev agrees to provide the Services detailed in Sections 3 through 6 of this document in exchange for the fees set out in Section 7. Any addition to this scope requires a written amendment signed by both Parties, as further described in Clause 13 (Entire Agreement).

3. Intellectual Property

All source code and intellectual-property rights in the Deliverables shall transfer to the Client only after full payment of ₹35,000 (the ₹10,000 advance, ₹10,000 MVP payment, and ₹15,000 final payment) has been received by Sitekraft.dev. Prior to full payment, Sitekraft.dev retains all rights in the Deliverables. Sitekraft.dev retains perpetual rights to any generic, reusable, or open-source boilerplate components used in building the Deliverables.

4. Confidentiality

Both Parties agree to maintain the confidentiality of the other Party's proprietary information, including source code, algorithms, business terms, and any personal or commercial data shared in the course of this engagement, for a period of two (2) years from the date of this Agreement. This obligation is mutual and applies equally to both Parties.

5. Payment Terms & Late Payment

The final payment of ₹15,000 is payable upon completion of testing and full project handover, as set out in Section 7. Production source code and full intellectual-property rights shall be handed over only after receipt of the final payment in full, per Clause 3 above. If the Client delays final payment beyond fourteen (14) days from the date of handover notification, a late-payment interest of 1.5% per month shall apply on the outstanding amount until paid.

6. Warranties & Disclaimers

Services are provided on an "as-is" basis following the 30-day bug-fix warranty period described in Section 9. Sitekraft.dev does not warrant the uptime, accuracy, or continued availability of any third-party API, market-data feed, or LLM provider integrated into the application, nor the outcome of the Google Play Store review process.

7. Limitation of Liability

The total liability of Sitekraft.dev arising out of or in connection with this Agreement, whether in contract, tort, or otherwise, is strictly capped at 100% of the fees actually paid by the Client under this Agreement (i.e. a maximum of ₹35,000). In no event shall Sitekraft.dev be liable for any indirect, incidental, or consequential damages, including loss of profit or decisions made in reliance on application outputs.

8. Indemnification

The Client agrees to indemnify and hold Sitekraft.dev harmless against any third-party claims, damages, or liabilities arising from the Client's use of the application, including claims arising from decisions made in reliance on Bulkbeat's outputs, subject to Section 13 (Risk & Compliance Disclaimer).

9. Termination

Either Party may terminate this Agreement with fourteen (14) days' written notice to the other Party. The ₹10,000 advance payment is non-refundable once Phase 1 work (Section 6) has commenced. In the event of termination after Phase 1 has commenced but before final handover, Sitekraft.dev will invoice the Client for work completed to date, on a pro-rata basis, in excess of payments already received.

10. Force Majeure

Neither Party shall be liable for any delay or failure to perform its obligations under this Agreement where such delay or failure results from circumstances beyond that Party's reasonable control, including natural disasters, government action, internet or cloud-provider outages, third-party API/data-source unavailability, or delays in the Google Play Store review process.

11. Dispute Resolution & Governing Law

This Agreement shall be governed by the laws of India. Any dispute arising out of or in connection with this Agreement shall first be attempted to be resolved amicably between the Parties; failing which, it shall be referred to sole arbitration under the Arbitration and Conciliation Act, 1996, with the seat of arbitration and exclusive jurisdiction of courts at Kanpur, Uttar Pradesh.

12. Notices

All formal notices under this Agreement shall be sent via email to the addresses of the respective Parties as set out on the cover page of this document, and shall be deemed received on the date of transmission.

13. Entire Agreement

This document, together with any duly signed written amendments, constitutes the entire agreement between the Parties regarding the Services described herein, and supersedes all prior discussions, proposals, or representations, whether oral or written.

14. Severability

If any provision of this Agreement is found to be invalid or unenforceable by a court or arbitral tribunal of competent jurisdiction, that provision shall be severed, and the remainder of this Agreement shall continue in full force and effect.

13. Risk & Compliance Disclaimer

Bulkbeat is an automated market-data analysis and decision-support tool. All portfolio health scores, risk ratings, institutional-activity tags ("Accumulation" / "Distribution" / "Neutral"), Action Center suggestions, and AI-generated verdicts are informational and educational in nature. They are generated from historical and real-time data patterns and do not constitute investment advice, a buy/sell recommendation, or a guarantee of future performance. Sitekraft.dev is not a SEBI-registered Research Analyst or Investment Adviser.

This disclaimer applies to every output of the application, including but not limited to: the Portfolio Intelligence Report (Section 4.1), the Per-Stock Smart Money View (Section 4.1), the Action Center watchlist (Section 4.1), and the AI-generated narrative summaries appearing throughout the app.

Users are strongly advised to conduct their own research and/or consult a SEBI-registered investment professional before making any investment decision. Sitekraft.dev's liability in connection with reliance on application outputs is governed by Section 12, Clause 7 (Limitation of Liability).

14. Quotation Validity

This quotation (Ref: **SKD-2026-BLK-001**) is valid for **15 days** from its date of issue, **22 August 2026** — i.e. until **6 September 2026**.

Should the Client wish to proceed after this validity period has lapsed, Sitekraft.dev reserves the right to review and, if necessary, revise the pricing and/or timeline set out in this document before reissuing it.

Acceptance of this quotation — whether by counter-signature (Section 15) or by payment of the advance amount described in Section 7 — constitutes agreement to all terms set out in this document, including the Formal Terms & Conditions in Section 12 and the Risk & Compliance Disclaimer in Section 13.

15. Acceptance & Signatory

By signing below, the Parties agree to be bound by all terms and conditions set forth in this Quotation cum Master Service Agreement, including Sections 1 through 14 in their entirety.

For Sitekraft.dev:

Ayush Tripathi

Chief Executive Officer

For the Client:
