PROFESSIONAL SUMMARY

3rd-year BCA student at VSICS Kanpur (CSJMU) with demonstrated competence in Python backend engineering, REST API architecture, and database design. Proven track record delivering real-world software including commercial market alert platform BulkBeat TV (₹1.11L revenue, 6K+ users) and academic ERP portal CSMS. Strong foundation in Data Structures, Algorithms, SQL, and OOP.

TECHNICAL SKILLS

Languages:	Python, SQL, JavaScript (ES6+), HTML5, CSS3, C, Java
Backend & APIs:	Python, Django, FastAPI, RESTful API Architecture, Uvicorn, Requests, Webhooks, Postman
Databases:	PostgreSQL, SQLite (WAL mode), Database Design, Normalization (3NF), ACID Properties
DevOps & Tools:	Linux (Ubuntu, systemd), Git, GitHub, Docker (basics), Postman, Render, Nginx
CS Fundamentals:	Data Structures & Algorithms (50+ solved patterns), Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

WORK EXPERIENCE

Technical Lead & Web Coordinator · DevQBX · devqbx.in 07/2026 – Present | Kanpur / Remote

- Led web development and technical operations for a 500+ student developer community, coordinating project showcases and hackathons.
- Mentored junior students on Python backend fundamentals, relational database design with SQL, and Git collaboration workflows.

Backend Developer · Sitekraft.dev · sitekraft.dev 03/2026 – Present | Remote

- Developed the backend architecture for BulkBeat TV, engineering automated financial news ingestion and Telegram alert broadcasting.
- Configured SQLite with WAL mode for concurrent operations and deployed production services on an Ubuntu Linux VPS with systemd monitoring.

KEY ENGINEERING PROJECTS

BulkBeat TV — Real-Time Market Intelligence Engine (bulkbeattv.com) Backend Developer & Project Lead

- Engineered a Python-based real-time market news and alert system, scanning 5+ live exchange and financial news feeds with automated parsing.
- Implemented a deterministic 20+ keyword filtering engine to eliminate market noise and highlight high-impact corporate announcements.
- Integrated automated Telegram Bot alerts for instant subscriber notifications; managed user subscriptions and payment tracking with SQLite database.
- Scaled platform to 6,000+ active users and generated ₹1.11 Lakhs in subscription revenue within months, running 24/7 on an Ubuntu Linux VPS.

College Student Management System (CSMS) — Educational ERP Portal Backend Developer · BCA 5th Sem Capstone Project

- Developed an educational ERP web portal using Python (FastAPI), PostgreSQL, and a responsive HTML5/CSS3/JavaScript frontend.
- Implemented Role-Based Access Control (RBAC) across 4 user roles: HOD, Section Incharge, Faculty, and Students with bcrypt password hashing.
- Designed normalized PostgreSQL schema for daily class attendance tracking, automated <75% attendance shortage alerts, and student grade calculation.
- Built semester fee ledger managing Paid, Partial, and Pending payment records; deployed application on Render cloud platform.

SmartGalla — Hyperlocal Kirana Store & Order Management Backend & Database Developer

- Developed a hyperlocal store management and ordering web portal for local Kirana merchants using Python, HTML5, CSS3, JavaScript, and PostgreSQL.
- Built product catalog management, real-time inventory tracking, and customer order placement workflows with Cash on Delivery (COD) tracking.
- Successfully piloted across 4–5 local Kirana grocery stores in Kanpur to validate real-world ordering before sunseting due to hosting infrastructure costs.

DocRoute — Document Text Extraction Engine Python Developer · Status: Under Development

- Developing a modular Python utility for extracting text from PDF documents and image files with automated fallback handling.
- Utilizes PyMuPDF for high-speed digital text extraction, automatically routing scanned or image-based pages to Tesseract OCR.
- Generates clean structured JSON output containing extracted text, page numbers, and document metadata for downstream analysis.

EDUCATION

Bachelor of Computer Applications (BCA) — Dr. Virendra Swarup Institute of Computer Studies (VSICS), CSJM University, Kanpur
2024 – 2027 · CGPA: 8.0 / 10

CERTIFICATIONS & HONORS

Generative AI & Data Analytics — Simplilearn (Distinction) • Machine Learning Internship — CodSoft (Distinction) • Cloud Computing Basics — VSICS • National Hackathon Finalist — ECLearnix
