PROFESSIONAL SUMMARY

3rd-year BCA student at VSICS Kanpur (CSJMU) with hands-on experience in Python data pipelines, automated data extraction, and machine learning models. Built live financial feed processing pipelines in BulkBeat TV and document text extraction systems in DocRoute. Experienced in Python (Pandas, Scikit-learn, TF-IDF), SQL databases, and Linux server environments.

TECHNICAL SKILLS

Languages & ML:	Python (Pandas, NumPy, Scikit-learn), SQL, NLP (TF-IDF), C, Java
Data & Backend:	Python, Django, FastAPI, REST APIs, PostgreSQL, SQLite (WAL mode), Data Modeling
Extraction & Tools:	PyMuPDF, Tesseract OCR, Linux (Ubuntu, systemd), Git, GitHub, Docker (basics), Render
CS Fundamentals:	Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS (ACID, Normalization), Operating Systems

WORK EXPERIENCE

Python & Data Pipeline Developer · Sitekraft.dev · sitekraft.dev 03/2026 – Present | Remote

- Developed high-throughput financial news ingestion pipelines and automated alert distribution for BulkBeat TV.
- Configured concurrent SQLite WAL logging and managed automated background ingestion tasks on Ubuntu Linux VPS.

KEY ENGINEERING PROJECTS

BulkBeat TV — Real-Time Market Intelligence Engine (bulkbeattv.com) Data Pipeline & Backend Lead

- Engineered a real-time financial market data ingestion pipeline in Python scanning 5+ live exchange feeds with automated signal extraction.
- Implemented a deterministic 20+ keyword rule filtering model to eliminate 90%+ market noise and detect high-conviction corporate actions.
- Configured SQLite database for subscription and alert tracking; scaled platform to 6,000+ active users and ₹1.11L revenue within months.

College Student Management System (CSMS) — Educational ERP Portal Backend Data Developer · BCA 5th Sem Capstone Project

- Engineered relational data management backend using FastAPI and PostgreSQL with composite schema constraints for student records.
- Built automated grading evaluation algorithms calculating weighted term scores and triggering attendance threshold risk alerts (<75%).
- Implemented secure 4-tier Role-Based Access Control and Pydantic request validation schemas; deployed via Render cloud platform.

SmartGalla — Hyperlocal Kirana Store & Order Management Backend & Database Developer

- Developed a hyperlocal store management and ordering web portal for local Kirana merchants using Python, HTML5, CSS3, JavaScript, and PostgreSQL.
- Built product catalog management, real-time inventory tracking, and customer order placement workflows with Cash on Delivery (COD) tracking.
- Successfully piloted across 4–5 local Kirana grocery stores in Kanpur to validate real-world ordering before sunseting due to hosting infrastructure costs.

DocRoute — Document Text Extraction Engine Python Developer · Status: Under Development

- Developing a modular Python utility for extracting text from PDF documents and image files with automated fallback handling.
- Utilizes PyMuPDF for high-speed digital text extraction, automatically routing scanned or image-based pages to Tesseract OCR.
- Generates clean structured JSON output containing extracted text, page numbers, and document metadata for downstream analysis.

EDUCATION

Bachelor of Computer Applications (BCA) — Dr. Virendra Swarup Institute of Computer Studies (VSICS), CSJM University, Kanpur

2024 – 2027 · CGPA: 8.0 / 10

CERTIFICATIONS & HONORS

- Generative AI & Data Analytics — Simplilearn (Distinction)
- Cloud Computing & Azure Fundamentals — VSICS
- Full-Stack Web Development Systems — VSICS
- Machine Learning Internship Certification — CodSoft (Distinction)
- National Hackathon Finalist — ECLearnix (Top Finalist)
