PROFESSIONAL SUMMARY

3rd-year BCA student at VSICS Kanpur (CSJMU) specializing in real-time data ingestion pipelines, automated NLP classification, and intelligent document processing. Experience deploying deterministic AI scoring rules, OCR extraction pipelines, and high-concurrency relational data models.

TECHNICAL SKILLS

Languages & ML: Python (AsyncIO, NumPy, Pandas, Scikit-learn), SQL, NLP (TF-IDF), Sarvam AI, C, Java
Data & Pipelines: PostgreSQL, SQLite WAL, Redis, Supabase, FastAPI, Tesseract OCR, PyMuPDF, Data Modeling
Frameworks & Web: REST APIs, Next.js 16, React 19, WebSockets, APScheduler, Pydantic, JSON Schema
Tools & Systems: Docker, Linux VPS, Git/GitHub, Playwright, Render, Systemd, Nginx

WORK EXPERIENCE

Chief Technology Officer (CTO) · DevQBX · devqbx.in 07/2026 – Present | Kanpur / Remote

- Directing system architecture for 500+ builder community — engineering standards, hackathon platform (QBX Arena), and API integrations.
- Overseeing data integrity, automated evaluation pipelines, and tech execution across concurrent initiatives.

Machine Learning Intern · CodSoft 11/2025 – 12/2025 | Remote

- Built supervised ML text classification pipelines using TF-IDF and Logistic Regression; optimized credit card fraud detection on imbalanced data. Distinction.

KEY ENGINEERING PROJECTS

BulkBeat TV — Real-Time Market Intelligence Engine (bulkbeattv.com) Data Pipeline & AI Systems Lead

- Engineered real-time market data ingestion pipeline in Python AsyncIO scanning 5+ live exchange sources with automated signal extraction.
- Developed 22-rule deterministic AI scoring model filtering 90%+ market noise to surface high-conviction institutional order flow.
- Integrated Sarvam AI and Tesseract OCR enrichment routines; scaled to 6,000+ active users and ₹1.11L commercial revenue within months.

SmartGalla — Geospatial Hyperlocal Commerce Platform Data & Spatial Systems Engineer

- Implemented Point-in-Polygon spatial clustering and indexing algorithms delivering sub-100ms merchant discovery for retail merchants.
- Designed multi-tenant relational data pipelines across 50+ PostgreSQL migrations with automated audit ledgers and inventory state tracking.
- Evaluated pilot metrics across 4–5 local Kirana shops in Kanpur to analyze merchant adoption constraints before sunsetting due to hosting costs.

College Student Management System (CSMS) — Cloud Educational ERP Backend Data Engineer

- Engineered academic data management backend using FastAPI and PostgreSQL with composite schema constraints for student analytics.
- Built automated grading evaluation algorithms calculating weighted term scores and triggering attendance threshold risk alerts (<75%).
- Implemented secure 4-tier RBAC and data validation with Pydantic schemas, deployed via Render Blueprint infrastructure-as-code.

DocRoute — Adaptive Document Intelligence Engine AI Systems Engineer · Status: Under Development

- Building adaptive document intelligence engine combining PyMuPDF native vector extraction with Tesseract OCR fallback for scanned PDFs.
- Formulating heuristic quality scoring routing incoming documents based on character density, DPI resolution, and text stream integrity.
- Establishing benchmark harness to evaluate extraction accuracy and latency across multi-layout document datasets (Under Development).

EDUCATION

Bachelor of Computer Applications (BCA) — Dr. Virendra Swarup Institute of Computer Studies (VSICS), CSJM University, Kanpur
2024 – 2027 · CGPA: 8.0 / 10 · Target SGPA: >= 9.0

CERTIFICATIONS & HONORS

Generative AI & Data Analytics — Simplilearn (Distinction) · ML Internship — CodSoft (Distinction) · Azure Cloud — VSICS · National Hackathon Finalist — ECLearnix (Distinction)
