PROFESSIONAL SUMMARY

3rd-year BCA student at VSICS Kanpur (CSJMU) with demonstrated competence in full-stack web engineering, data structures, and distributed architectures. Proven track record delivering real-world software across financial media streaming, geospatial commerce, and university ERP systems.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, C, C++, Java
Frontend & Web: Next.js 16 (App Router), React 19, Vanilla JS ES6+, HTML5, CSS3, Zustand, PWA
Backend & Databases: FastAPI, RESTful APIs, WebSockets, PostgreSQL, SQLite WAL, Supabase, Redis
CS Fundamentals: Data Structures & Algorithms (50+ patterns), OS, DBMS (ACID, Normalization), Networks, Git/GitHub

WORK EXPERIENCE

Chief Technology Officer (CTO) · DevQBX · devqbx.in 07/2026 – Present | Kanpur / Remote

- Directing technical architecture for 500+ builder community — engineering standards, hackathon platform (QBX Arena), and API integrations.
- Overseeing platform reliability, code reviews, and developer mentorship under production constraints.

Project Manager & Systems Architect · Sitekraft.dev · sitekraft.dev 03/2026 – Present | Remote

- Architected BulkBeat TV Telegram engine; engineered 22-rule AI scoring and <5s alert delivery on 1GB VPS for paying subscribers.
- Engineered SQLite WAL concurrency, automated subscription billing, and hardened Linux VPS deployments.

KEY ENGINEERING PROJECTS

BulkBeat TV — Real-Time Market Intelligence Engine (bulkbeattv.com) Lead Systems Architect & Backend Developer

- Developed asynchronous media ingestion backend in Python AsyncIO and Next.js 14 PWA with Clerk Auth and TradingView chart widgets.
- Integrated Telegram Bot Webhooks with sub-second alert broadcast; built 22-rule scoring eliminating 90%+ market noise.
- Hardened SQLite with WAL mode and 30s busy-timeout queues; scaled to 6,000+ active users and ₹1.11L revenue within months.

SmartGalla — Geospatial Hyperlocal Commerce Platform Full Stack Engineer

- Built a hyperlocal commerce PWA using Next.js 16 App Router, React 19, Supabase PostgreSQL, and Zustand for offline-first store interactions.
- Implemented Point-in-Polygon spatial lookups with sub-100ms inventory hydration and atomic PostgreSQL transactions.
- Successfully piloted across 4–5 local Kirana shops in Kanpur, validating end-to-end order flows before infrastructure cost sunset.

College Student Management System (CSMS) — Cloud Educational ERP Full Stack Developer

- Built end-to-end College ERP with FastAPI REST backend (28 endpoints), Supabase PostgreSQL, and responsive vanilla JS portals.
- Designed 4-tier RBAC system (HOD, Incharge, Faculty, Student) with bcrypt password hashing and session authentication.
- Automated attendance roster tracking (<75% alert trigger), grade evaluation (A–F marks computation), and Render/Vercel deployment.

DocRoute — Adaptive Document Intelligence Engine Software Developer · Status: Under Development

- Designing document intelligence engine integrating PyMuPDF vector text extraction with OCR fallback for degraded scans.
- Implementing hybrid extraction router that assesses character density to dynamically switch between direct parsing and OCR.
- Structuring unified JSON output schema with extraction provenance for downstream workflows (Under Active Development).

EDUCATION

Bachelor of Computer Applications (BCA) — Dr. Virendra Swarup Institute of Computer Studies (VSICS), CSJM University, Kanpur
2024 – 2027 · CGPA: 8.0 / 10 · Target SGPA: >= 9.0

CERTIFICATIONS & HONORS

Generative AI & Data Analytics — Simplilearn (Distinction) · ML Internship — CodSoft (Distinction) · Azure Cloud — VSICS · National Hackathon Finalist — ECLearnix (Distinction)
